

Science Project PowerPoint Presentation Rubric (17 slides minimum)

- **You must use the PowerPoint template on the class web page. This is the same template I emailed to everyone. No exceptions.**
- **Your PowerPoint must include a paragraph for each of the relevant articles you have read. You need four paragraphs with the MLA reference citations. If it is a web reference you must include the URL (web address). I will subtract five points for each missing cited paragraph.**
- **I will subtract up to 7 points for grammar, spelling, sentence structure, and formatting errors (including fonts < 20) and changing backgrounds (you may change the backgrounds to white if you like). Do not add designs or art to the slides.**

Title slides (2 slides minimum):

Slide 1, your name, date & period number only!!!!

2 points _____

Slide 2 - Title/ Research Question: (The effect of _____ on _____) . Delete the parenthesis!!!!

- Do not combine these slides as they must be separate. To receive credit both slides must be completed.

Introduction and Background (2 slides minimum):

4 Pts. _____

- Fill in the important information from your research
- Fill in the rationale/importance of study/why is it relevant
- Fill in the purpose of this experiment is to determine.....
- Fill in: I predict that because*..... (* Based on your research)

Experimental Design Diagram (EDD) and Procedures Slides (two slides minimum):

6 Pts. _____

- Complete the EDD on the slide. The slide has examples of the levels of the IV and trials. Replace these with your own information.
- Fill in the procedures and the materials and equipment on the Procedures slides

Data table (one slide):

6 Pts. _____

- Complete the data table on the slide. You must use the format of the data table on the slide. If you used this format in your report you may copy & paste it.
- The data table includes a title, includes all levels of the IV, and all trials of the DV. The table must include column headings that describe the IV, the DV and include units in parenthesis. The table must include an average for the trials for each level of the IV. Any calculated values (i.e., rate) must be included to the right of the average/ mean column. . Numbers must be neatly 'lined up.' Units only appear in the column headings

Analysis of data(one slide):

6 Pts. _____
